## A note about information used to prepare your financial plan:

In preparing this plan, we have not reviewed any of your documents and have relied on the accuracy and completeness of the information that you have provided to us. If there are material inaccuracies or omissions in the information provided, this may affect our analysis and recommendations. Minor discrepancies should not affect our conclusions.

The financial projections contained in this plan are used to reach general conclusions as to the sufficiency of your resources to meet your lifestyle objectives. They are intended to be guidelines only. The future cannot be forecast with certainty and the degree of uncertainty normally increases with the length of the future period covered. Actual results over time will vary from the projections made in this plan and the variations may be material. Therefore, in reading this plan you should focus on the general conclusions reached at this time, rather than on the underlying detail.

## WHY IS FINANCIAL PLANNING SO IMPORTANT?

You have ideas as to how you want to live your life. Where and how you'd like to live, things you'd like to experience and do. Just like any journey, you are more likely to reach your goals when you have a road map to help guide you. A solid financial plan will assess your current situation, and outline how to get from "where you are" to "where you want to be". The plan will also typically deliver one of two messages: peace of mind, as your financial affairs are in good order, or a reality check that you will need to make some changes in order to achieve your goals.

With insight and advice from your advisors, Lana Smith and Judy Carson, you can use the information in this financial plan to understand your current situation and set targets for how much you will spend and save so that you can achieve your goals.

We help you answer the following questions:

- What do we have today? We summarize your current net wealth.
- Will it be enough to meet our needs? We review your goals and determine if the amount you have saved and the money you expect to receive in the future will be enough to achieve your personal goals and lifestyle objectives.
- What happens if things change? We also look at the impact to your plan of changes to how much money you spend versus save, how much you earn on your investments (rate of return), and how long you live.
- Is our family protected? We look at what insurance you have and what would be needed to support your lifestyle objectives to determine if your family is protected in the event of death, disability or critical illness. We also look at the effect of income taxes in the event of death, to ensure you have enough to cover costs.

It is important to note that developing a financial plan is not a one-time isolated event. Just as your goals will change over time, so will your plan. Lana Smith and Judy Carson will work with you to implement and monitor your plan, making updates and changes as your life and circumstances change along the way.

## About your financial plan

Throughout your financial plan, you will see conclusions we have reached based on our review and analysis of your situation, as well as our recommendations for action.

- This symbol indicates our conclusions including any recommended actions.

You should review each section of this plan carefully, and together with Lana Smith and Judy Carson consider all of the recommendations in this document to ensure that you continue to achieve your objectives.

## YOUR LIFESTYLE OBJECTIVES

You've told us that you have the following goals, which we have used to build your financial plan. A more detailed listing of the facts and assumptions used in this plan is located in Appendix 1.

- Robert intends to retire at the age of 65, on February 1, 2018 - 2 years from now. Robert is projected to have 25 years of retirement, living to age 90 .
- You want to ensure that you have enough money to provide approximately $\$ 44,300$ each year, to meet your cash flow needs. The $\$ 44,300$ is in today's dollars, not accounting for inflation. You have indicated that this amount will decrease to $\$ 35,400$ in retirement.
- You intend to spend $50 \%$ of any after-tax cash flow surpluses and invest $50 \%$ of any after-tax cash flow surpluses.
- You want to minimize taxes related to the transfer of your wealth to the next generation.
- You intend to cover $100 \%$ of your current lifestyle expenditures, in the event either of you were to die.
- You intend to cover $100 \%$ of your current lifestyle expenditures, in the event Robert were to become disabled.
- You have advised us that you currently spend the amounts listed in the "Today" column of the table below. Based on what you've told us, we have projected your spending in the first full year of retirement, in the year 2020, in the column titled "In Retirement".

| Category | Today | In Retirement |
| :--- | ---: | ---: |
| Lifestyle expenditures | $\$ 44,300$ | $\$ 39,075$ |
| Vacation expense | $\$ 0$ | $\$ 6,623$ |
| El premiums | $\$ 955$ | $\$ 0$ |
| CPP contributions | $\$ 2,544$ | $\$ 0$ |
| Life insurance premiums | $\$ 402$ | $\$ 167$ |
| Disability insurance premiums | $\$ 1,279$ | $\$ 0$ |
| Total Expenditures | $\$ 49,480$ | $\$ 45,865$ |

## ACHIEVING YOUR LIFESTYLE OBJECTIVES

## What do we have today?

We have prepared this summary of your wealth position based on the information provided to us in your financial plan questionnaire dated June 13, 2016, and subsequent discussions with your Assante financial advisors, Lana Smith and Judy Carson.

|  | Robert | Diane | Joint | Total |
| :---: | :---: | :---: | :---: | :---: |
| Non-Registered Assets |  |  |  |  |
| Assante Portfolio CC (Joint) |  |  | 293,800 | 293,800 |
| Sun Life Shares (Robert) | 20,000 |  |  | 20,000 |
| Total Non-Registered Assets | 20,000 |  | 293,800 | 313,800 |
| Registered Assets |  |  |  |  |
| Assante RRSP (Robert) | 4,800 |  |  | 4,800 |
| Sun Life RPP (Robert) | 675,400 |  |  | 675,400 |
| Assante TFSA (Robert) | 45,700 |  |  | 45,700 |
| Assante RRSP (Diane) |  | 7,100 |  | 7,100 |
| Assante Sp RRSP (Diane) |  | 34,200 |  | 34,200 |
| Credit Union Sp RRSP (Diane) |  | 20,000 |  | 20,000 |
| Assante TFSA (Diane) |  | 45,700 |  | 45,700 |
| Total Registered Assets | 725,900 | 107,000 |  | 832,900 |
| Lifestyle Assets |  |  |  |  |
| Home (Joint) |  |  | 300,000 | 300,000 |
| Turkey Lake Cabin (Joint) |  |  | 200,000 | 200,000 |
| Total Lifestyle Assets |  |  | 500,000 | 500,000 |
| Life Insurance Cash Value |  |  |  |  |
| London Life | 36,000 |  |  | 36,000 |
| London Life | 3,000 |  |  | 3,000 |
| Total Life Insurance Cash Value | 39,000 |  |  | 39,000 |
| Total Net Wealth | 784,900 | 107,000 | 793,800 | 1,685,700 |

## Will it be enough to meet our needs?

This analysis reviews your situation to answer the basic question: "Do we have enough?"
Our analysis indicates that your net wealth on the death of the surviving spouse at age 90 is projected to be approximately $\$ 3,600,000$.

- This indicates that your resources should be sufficient to meet your lifestyle objectives throughout your lives.

The effects of inflation will erode the buying power of your assets over time. This graph illustrates the projected buying power of your net wealth adjusted for our assumed rate of inflation of 2.5\%.

## Total Net Wealth

Our projections indicate that the buying power of your net wealth on the death of the surviving spouse at age 90 is projected to be approximately $\$ 1,800,000$. This is greater than your current net wealth of approximately $\$ 1,700,000$ and indicates that you will continue to accumulate capital throughout your lives.

Detailed facts and assumptions, including the rates of return used in our projections, are located in Appendix 1 of this plan.

## What happens if things change?

The preceding analysis indicated that you should have enough to meet your lifestyle goals and objectives throughout your lives.

In order to show you how your plan is impacted by the variability of assumptions, we have also prepared the following scenarios to illustrate the effect of changing how much money you spend versus save, how much you earn on your investments (rate of return), and how long you live.

Before you take any action to either increase your spending or change your overall approach to investing, the results of these scenarios should be reviewed in detail with your advisors.

## HOW LIKELY IS THE OUTCOME?

To give you an idea of how sensitive your plan is to how much you earn on your investments and how long you live, we ran an analysis on your plan 1,000 times using statistically randomized combinations of rate of return and life expectancy.

- Based on our analysis of your current situation, you currently have a 100\% probability of success in achieving all of your goals and objectives throughout your lives.

## HOW MUCH MORE COULD WE SPEND?

Spending more than you plan can have a significant impact on your ability to achieve your goals. We looked at increasing your spending to the point where you exhaust your liquid assets immediately prior to death, without incurring any annual cash flow deficits.

- If your regular annual lifestyle expenditures were approximately $\$ 81,200$ (and did not decrease at retirement), and you were to invest $100 \%$ of any cash flow surpluses, your resources would be sufficient to meet your lifestyle objectives throughout your lives.

## WHAT RATE OF RETURN DO WE NEED?

Your situation is also impacted by the performance of your investments. We looked at decreasing the rate of return on your investment assets to zero to determine if your resources will still be able to support your lifestyle without incurring any annual cash flow deficits.

D If all of your investment assets earned a $0 \%$ rate of return your resources would still be sufficient to meet your lifestyle objectives throughout your lives.

## PROTECTING YOUR FAMILY

## Is our family protected if Robert were to die?

An important consideration is whether the surviving spouse, if one of you were to die, would have enough to continue to meet the lifestyle objectives you have set. We analyze the need for life insurance to provide for Diane if Robert were to die.

The table below illustrates what amount of insurance coverage would be needed to support the surviving spouse, in the event of Robert's death on December 31 of each year over the next 10 years. We have also looked at your existing insurance coverage, and identified whether there is a projected excess or shortfall.

## IF ROBERT WERE TO DIE - WOULD DIANE BE OKAY?

|  |  | Age | Insurance Needed | Existing Insurance - <br> Dying Member | Existing Insurance - <br> Year |
| :---: | :---: | ---: | ---: | ---: | ---: |
| 2016 | $63 / 62$ | 0 | 165,000 | 0 |  |
| 2017 | $64 / 63$ | 0 | 167,400 | 0 | 165,000 |
| 2018 | $65 / 64$ | 0 | 5,000 | 0 | 167,400 |
| 2019 | $66 / 65$ | 0 | 5,000 | 0 | 5,000 |
| 2020 | $67 / 66$ | 0 | 5,000 | 0 | 5,000 |
| 2021 | $68 / 67$ | 0 | 5,000 | 0 | 5,000 |
| 2022 | $69 / 68$ | 0 | 5,000 | 0 | 5,000 |
| 2023 | $70 / 69$ | 0 | 5,000 | 0 | 5,000 |
| 2024 | $71 / 70$ | 0 | 5,000 | 0 | 5,000 |
| 2025 | $72 / 71$ | 0 | 5,000 | 0 | 5,000 |
|  |  |  |  | 0,000 |  |

- The above table illustrates that you should have enough coverage to support Diane in the event of Robert's death at any point in time over the next 10 years.

## IF WE BOTH WERE TO DIE - WOULD OUR ESTATE HAVE ENOUGH LIQUIDITY TO PAY OUR FINAL INCOME TAXES?

On your death, many of your assets become subject to income tax. You may not want to be forced to sell assets such as your home or cabin in order to pay those taxes. Life insurance can be a very cost effective tool to provide your estate with liquidity.

This analysis determines if you have sufficient liquidity in your estate to pay your final income taxes by comparing the estimated income tax liability on your deaths to your projected assets in each year between 2016 and 2044.

Assets that are readily convertible into cash, such as registered and non-registered investments, are defined as liquid assets (green). The blue bars represent the life insurance proceeds, if any, receivable in any given year by your estate. Illiquid assets (orange) are assets that are not readily convertible into cash, such as real estate. The red line represents the estimated income tax liability on your deaths over the same period of time. As long as the red line remains below the orange bars your estate will have sufficient liquidity to pay your final income taxes.

## Estate liquidity

- The above illustration indicates that your liquid assets (which would include any life insurance that is receivable by your estate) should exceed your estimated income tax liability on death in each year throughout your lives. Therefore, your liquid assets could be used to fund the income tax liability on your deaths.

## IF WE BOTH WERE TO DIE - WOULD OUR ESTATE BE ERODED BY INCOME TAXES?

On death, taxes will reduce the amount of your estate available to your beneficiaries. This analysis looks at whether life insurance could be used to preserve the capital of your estate from the effects of taxation.

The previous analysis indicated that you could use your liquid assets to fund the income tax liability on your deaths. However, you may want to use additional life insurance to fund that tax liability. Life insurance can be a very cost effective tool to preserve the value of your estate.

The dark blue bars in the following graph illustrate your "Estate Shrinkage" in each year throughout your lives assuming that you both die in the same year. The light blue area shows the gross value of your estate before both income taxes on death are paid and life insurance proceeds are received, for comparison. The red line represents the net after-tax value of your estate. As long as the dark blue bars remain below the $\$ 0$ line on the graph your estate will not be eroded by your final income taxes. Dark blue bars above the $\$ 0$ line indicate estate shrinkage.

## Estate preservation

- The above graph indicates that the value of your estate will be eroded by income taxes on death at various points in time throughout your lives. As such, you may wish to consider the use of additional life insurance to preserve the capital of your estate.

This illustration does not reflect the life insurance policy with a death benefit of $\$ 5,000$, which is payable directly to Robert's brother.

Appendix 4, at the end of this plan, provides a table showing selected details from the above graph, including your projected income taxes on death, if you were both to die in any year, for each year of the plan.

## IF WE WERE BOTH TO DIE - HOW COULD WE EFFICIENTLY FUND OUR TAX LIABILITY ON DEATH?

Although the previous analyses indicated that your estates have sufficient assets and the necessary liquidity to fund the tax liability on your deaths, a more efficient use of capital may be to utilize life insurance to pay the taxes.

## Alternative ways to fund tax liabilities on death

There are three basic strategies that can be used to fund future tax obligations. They are as follows:

- Make a lump sum payment from the estate - This strategy could cost the estate a significant portion of its total value. If the sale of estate assets must be carried out quickly or at a time when market values are depressed, the impact will be magnified.
- Create an investment sinking fund - This strategy creates exposure in situations where premature death results in the tax liability exceeding the accumulated fund balance at the time. In addition, taxes will have to be paid on any income earned on the accumulating funds.
- Use life insurance - This strategy preserves the assets of the estate while ensuring that funds are available to pay the tax liability. In most situations, the fixed cost and guaranteed proceeds of insurance is a more efficient use of capital than either of the two alternatives above.

The following graph illustrates the relative costs for each of the three alternative strategies noted above, on the assumption that you wish to cover the maximum amount of estate shrinkage noted in Appendix 4, which is projected to be approximately $\$ 645,000$ in the year 2026. The cost of life insurance is based on a $\$ 650,000$ term-to-100 joint last-to-die policy for persons of your ages, assuming that you are both non-smokers and that Diane is not insurable.

- If using life insurance is of interest to you, Lana Smith and Judy Carson could assist you in obtaining the appropriate coverage.

## Is our family protected if Robert were to become disabled?

At any given point in time, the risk of becoming disabled is greater than the risk of dying. Disability can occur either over a long period of time, due to illness or age, or can be a splitsecond event. The risk of disability can be covered through non-insured sources such as investment assets, through government benefits or through specific disability insurance as part of a group plan or individual policy.

There are many aspects of disability coverage that should be reviewed to determine if you have sufficient coverage to meet your family's lifestyle objectives in the event of permanent disability.

Generally, disability coverage can only be obtained to replace income earned from employment or from a profession. Each disability policy will define what constitutes a "disability" for the purpose of making a claim and what short-term or long-term disability means. Each policy will also provide some limits to coverage such as a waiting period before benefits commence and cessation of benefits at a specified age.

We analyze the effect on your situation if Robert were to become permanently disabled, on December 31, 2016. This analysis assumes that:

- Robert's employment income ceases
- benefits would be payable under any existing short-term and long-term disability insurance policies.

## IF ROBERT WERE TO BECOME DISABLED - WOULD WE BE OKAY?

- Our analysis indicates that if Robert were to become permanently disabled, your resources should be sufficient and you would not incur any sustained cash flow deficits throughout your lives. This indicates that Robert should not need additional disability insurance to meet your lifestyle objectives.

## Is our family protected if Robert were to become critically ill?

If you contract a severe medical condition such as cancer or have a heart attack, you may not be able to continue working. In addition, you may not be able to afford medical treatment not covered by government health plans, or special treatments only available out of country.

Critical illness insurance provides a tax-free lump sum payment on the occurrence of a critical illness. The lump sum can be used to fund any of the costs associated with the recovery from such an illness, to replace lost income, or in any other way you wish. In addition, many critical illness policies offer a variety of options, including a reimbursement of all premiums paid if you do not receive a critical illness benefit during a specified period.

We analyze the effect on your situation if Robert were to become critically ill, but not permanently disabled, for a period of one year beginning on December 31, 2016. This analysis assumes that:

- Robert's employment income ceases for a period of one year
- benefits would not be payable under any existing disability insurance policies
- you incur \$100,000 of additional expenses during 2017.

## IF ROBERT WERE TO BECOME CRITICALLY ILL - WOULD WE BE OKAY?

- Our analysis indicates that if Robert were to become critically ill, your resources should be sufficient and you would not incur any sustained cash flow deficits throughout your lives. This indicates that Robert should not need critical illness insurance to meet your lifestyle objectives; however, you may want to explore the cost effectiveness of critical illness insurance as an alternative to using your existing assets.

## ACTION PLAN

## Summary of recommendations

Below is a summary of our recommendations for the different components of your financial plan, which you, Lana Smith and Judy Carson should review in light of your circumstances and objectives.

## ACHIEVING YOUR LIFESTYLE OBJECTIVES

## Robert

Continue to maximize your RRSP contributions on an annual basis.

## Both Robert \& Diane

- Continue to maximize your TFSA contributions on an annual basis.
- Consider consolidating your investment portfolio for easier management and monitoring of results.
- Review your current Investment Policy Statement with your financial advisors to ensure that your asset allocation remains appropriate as you approach retirement.

## PROTECTING YOUR FAMILY

## Both Robert \& Diane

- Continue to pay the annual premiums on your existing life and disability insurance policies in order to keep them in force.
- Consider purchasing additional life insurance as a cost-effective method of replacing the capital of your estate that will be lost to taxation on death.

## PERIODIC REVIEW

## Both Robert \& Diane

- Review your financial situation and insurance coverage regularly with your Assante financial advisors, Lana Smith and Judy Carson, to ensure that you remain on track to achieve your lifestyle objectives.

## APPENDIX 1: FACTS AND ASSUMPTIONS

## Personal assumptions

In preparing this plan, we have used the following personal assumptions:

- Robert is currently 63 years old and Diane is currently 62 years old.
- Statistics Canada’s average life expectancy, given your current ages, is 81 for Robert and 84 for Diane. Please note that as an "average", there is a $50 \%$ probability that you will outlive this statistical age. Therefore, in order to be conservative we have assumed a greater-than average life expectancy in our projections. Our plan assumes a life expectancy of 90 years for both of you.
- Our plan is based on your estimate of your regular annual after-tax lifestyle expenditures, as well as the other expenditures noted in the summary which follows. We have assumed that your annual expenditures will increase by the assumed rate of inflation (2.5\%).
- You have advised us that you are both residents of Canada for income tax purposes. You have also advised us that neither of you are US citizens or US Green Card holders.

## Financial assumptions

We have made the following financial assumptions:

- Annual Deficit Coverage - Annual deficits are covered from non-registered investments before registered investments are accessed.
- Retirement Asset Transfers - Your retirement savings assets (i.e. RRSPs and LIRAs) are not transferred to income stream generating assets (i.e. RRIFs, LIFs, or annuities) until December $31^{\text {st }}$ of the year in which you reach age 71.
- Life Insurance Proceeds - The net wealth and net estate projections and graphs contained in this plan do not include the value of any life insurance proceeds that are payable directly to beneficiaries other than the spouse and the estate of the deceased.

## Income tax assumptions

In preparing the projections, we have assumed that the federal tax rates do not change. However, the tax brackets and tax credits will increase by $2.5 \%$ per year due to the fact that we have assumed an inflation rate of $2.5 \%$. This is in accordance with federal legislation that annually indexes income tax brackets and tax credits by the rate of inflation.

## Federal and provincial budget proposals

Federal and provincial budgets often propose income tax related measures that are to take effect over a number of years. In addition, there are federal and provincial measures that propose changes to pension and other legislation.

Please note that some of the tax and other changes contained in these measures remain proposals for extended periods of time, and these proposals may be subject to change prior to the ultimate passage of the legislation. Software limitations preclude us from reflecting the impact of these proposals in the financial projections included with this plan until the proposals become law.

## Summary of personal financial information

General Information

| Detail | Robert | Diane |
| :--- | ---: | ---: |
| Birth Date | Jan 2 1953 | May 28 1954 |
| Retirement Date | Feb 2018 | Jun 2019 |
| Disability Date | N/A | Unknown |
| Life Expectancy | Dec 2043 | Dec 2044 |
| CPP/QPP Benefits start on | Age 65 | Age 65 |
| OAS Benefits start on | Age 65 | Age 65 |
| Qualify for \% of Max. CPP/QPP Benefits | $100 \%$ | $76 \%$ |
| Qualify for \% of OAS Benefits | $100 \%$ | $100 \%$ |
| Earned Income (2015) | $\$ 80,000$ | $\$ 0$ |
| Pension Adjustment (2015) | $\$ 10,800$ | $\$ 0$ |
| Unused RRSP Deduction Room | $\$ 0$ | $\$ 0$ |

## Tax Options

The option "Joint Election to Split Pension Income" was selected. By selecting this option both clients have agreed to split their pension income for tax purposes.

## Children

| Name | Birth Date |
| :--- | :---: |
| Carl | Mar 11 1979 |
| Sherry | Mar 11 1981 |

## Regular Income

| Income Source | Member | Applicable | Amount | Indexed |
| :--- | :---: | :---: | ---: | ---: |
| Employment Salary | Robert | Jan 1 2016 to Jan 31 2018 | $\$ 80,000$ | $1.50 \%$ |

## Regular Expenses

|  |  |  |  | While <br> Expense | While <br> Retired | While <br> Survivor | Annual <br> Amount | Indexed |
| :--- | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |

## Lump Sum Expenses

| Expense | Member | Applicable | Amount | Indexed |
| :--- | :---: | :---: | ---: | ---: |
| Expense Incurred if Critically III | Robert | Robert's Critical Illness Date | $\$ 100,000$ | No |

## Semi-Regular Expenses

| Expense | Member | Start Date | End Date | Every | Amount | Indexed |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| New Vehicle | Robert | Jun 12022 | Jun 12036 | 7 years | $\$ 40,000$ | Inflation |

## Surplus Expenses

| Surplus Of | Percentage | Applicable |
| :--- | :---: | :---: |
| Robert and Diane | $50 \%$ | Jan 1 2016 to Dec 312043 |
|  |  | (the latter of Robert and Diane's Deceased Date minus 1 year) |

## Lifestyle Assets

|  | Purchase <br> Date | Purchase <br> Amount | Market <br> Value Date | Market <br> Value | Growth <br> Rate | Standard <br> Deviation |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Home (Joint/Lifestyle) | Jan 12011 | $\$ 190,000$ | Jan 1 2016 | $\$ 300,000$ | $2.5 \%$ | $0.0 \%$ |
| Turkey Lake Cabin (Joint/Lifestyle) | Jan 1 1986 | $\$ 120,000$ | Jan 1 2016 | $\$ 200,000$ | $2.5 \%$ | $0.0 \%$ |

## Portfolio Assets

| Asset Name | Market Value Date | Market Value | Cost Base | Int. <br> (\%) | Div. <br> (\%) | Cap. Gain (\%) | Def. Growth (\%) | Std. <br> Dev. <br> (\%) | Total (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assante Portfolio CC | Jan 12016 | \$0 | \$0 | 0.00 | 0.70 | 1.30 | 3.00 | 9.10 | 5.00 |
| (Diane/Non-Reg.) |  |  |  |  |  |  |  |  |  |
| Assante Portfolio CC (Joint/Non-Reg.) | Jan 12016 | \$293,800 | \$301,600 | 0.00 | 0.70 | 1.30 | 3.00 | 9.10 | 5.00 |
| Assante Portfolio CC (Robert/Non- | Jan 12016 | \$0 | \$0 | 0.00 | 0.70 | 1.30 | 3.00 | 9.10 | 5.00 |
| Reg.) |  |  |  |  |  |  |  |  |  |

## APPENDIX 4: TAX LIABILITY PROJECTIONS

The following table illustrates your tax liability on death, insurance proceeds payable to your estate, estate shrinkage and net estate projected for each year throughout your lives.

| Year | Age(s) | Additional Taxes <br> for Estate | Insurance <br> Proceeds | Estate <br> Shrinkage (\$) | Net Estate |
| :--- | :---: | ---: | ---: | ---: | ---: |
| 2016 | $63 / 62$ | 412,509 | 175,000 | 232,509 | $1,522,045$ |
| 2017 | $64 / 63$ | 444,341 | 177,400 | 261,941 | $1,588,800$ |
| 2018 | $65 / 64$ | 461,816 | 15,000 | 441,816 | $1,480,992$ |
| 2019 | $66 / 65$ | 491,779 | 15,000 | 471,779 | $1,524,253$ |
| 2020 | $67 / 66$ | 521,981 | 15,000 | 501,981 | $1,572,630$ |
| 2021 | $68 / 67$ | 550,763 | 15,000 | 530,763 | $1,625,812$ |
| 2022 | $69 / 68$ | 580,608 | 15,000 | 560,608 | $1,634,971$ |
| 2023 | $70 / 69$ | 609,199 | 15,000 | 589,199 | $1,699,970$ |
| 2024 | $71 / 70$ | 641,442 | 15,000 | 621,442 | $1,765,608$ |
| 2025 | $72 / 71$ | 663,764 | 15,000 | 643,764 | $1,810,923$ |
| 2026 | $73 / 72$ | 664,740 | 15,000 | 644,740 | $1,875,189$ |
| 2027 | $74 / 73$ | 663,188 | 15,000 | 643,188 | $1,944,091$ |
| 2028 | $75 / 74$ | 660,917 | 15,000 | 640,917 | $2,015,903$ |
| 2029 | $76 / 75$ | 657,890 | 15,000 | 637,890 | $2,063,192$ |
| 2030 | $77 / 76$ | 653,759 | 15,000 | 633,759 | $2,140,216$ |
| 2031 | $78 / 77$ | 648,857 | 15,000 | 628,857 | $2,220,408$ |
| 2032 | $79 / 78$ | 643,028 | 15,000 | 623,028 | $2,304,015$ |
| 2033 | $80 / 79$ | 63,234 | 15,000 | 61,234 | $2,391,216$ |
| 2034 | $81 / 80$ | 628,419 | 15,000 | 608,419 | $2,482,139$ |
| 2035 | $82 / 81$ | 619,363 | 15,000 | 599,363 | $2,577,067$ |
| 2036 | $83 / 82$ | 609,202 | 15,000 | 589,202 | $2,641,670$ |
| 2037 | $84 / 83$ | 598,215 | 15,000 | 578,215 | $2,748,256$ |
| 2038 | $85 / 84$ | 587,187 | 15,000 | 567,187 | $2,863,771$ |
| 2039 | $86 / 85$ | 575,427 | 15,000 | 555,427 | $2,984,116$ |
| 2040 | $87 / 86$ | 562,441 | 15,000 | 542,441 | $3,109,975$ |
| 2041 | $88 / 87$ | 548,173 | 15,000 | 528,173 | $3,241,634$ |
| 2042 | $89 / 88$ | 532,560 | 15,000 | 512,560 | $3,379,341$ |
| 2043 | $90 / 89$ | 515,513 | 15,000 | 495,513 | $3,523,400$ |
| 2044 | $91 / 90$ | 538,371 | 10,000 | 525,871 | $3,607,749$ |

[^0]:    ${ }^{1}$ We understand that the death benefit is 2 times salary, indexed by $1.5 \%$.

[^1]:    ${ }^{2}$ We have assumed that, as permitted by the governing legislation in the province of Ontario, you will unlock $50 \%$ of the value of your LIF.
